About ARISE Program :

Dear Friends & Colleagues,

It is our privilege to welcome you to 21st ARISE (Anesthesia Related Integrated Short Education) program on 11th Aug, Sunday. This time, we are conducting CME on “**ULTRASOUND FOR REGIONAL ANESTHESIA**”.

In last decade, there were many innovations introduced in anesthesia practice due to ultrasonography. The precision of regional blocks improves with ultrasound and peripheral nerve stimulation. Nowadays, the patient care is also highly demanding to improve the result in health care. We are going to cover interactive video session with hands-on ultrasound guided regional block.

We hope that this CME will be very useful to all of us to improve the safety on the regional block. We will have an enjoyable & informative experience.
